

Water terminal unit

Indoor installation, wall-mounted, cased
Capacity from 1,87 to 3,81 kW

ELFOSpace

ELFOSpace WALL2 is a range of cased water terminals that are cleverly designed to be placed in the space above doors or at mid-height on walls, and are particularly suitable, thanks to the accurate design, to residential and hotel installations.

These units also feature:

- ▶ exceptionally low noise operation;
- ▶ air flow direction control;
- ▶ all the components needed for installation and start-up (template, wall thermostat or infrared remote control, three- or two-way valve).

The above mentioned data are referred to standard units for the constructive configurations indicated. For all the other configurations, refer to the relative Technical Bulletin.

Hydraulic connections on left side

Minimum distance of the unit from the ground: 2 m.

Maximum distance of the unit from the ground: 3 m.

CAUTION! For trouble-free operation of the unit it is essential to maintain the safety distances indicated by the green areas.
